

OUR EXPERTISE

at the service of operational performance to support our customer's products

CNIM Systèmes Industriels has **recognised experience** in the **design, manufacture and integration of high value systems** in the **naval and nuclear deterrent sectors**.

All required operations including material and human resources of the product life cycle are integrated from the beginning and is secured through detailed and specific ILS (integrated logistic support) studies.

In the design of our equipment, we ensure that all industrial requirements of the shipyards are taken into account.

Our experience enables us to fully **understand our customers' constraints**, and to **bring our know-how to exceed the operational requirements**.

WE ARE COMMITTED TO THE OPERATIONAL SAFETY AND PERFORMANCE OF OUR PRODUCTS

CNIM
Systèmes Industriels

CNIM Systèmes Industriels (CSI) is a systems integrator of products with high technical requirements.

A major partner in the defense and security sector, CNIM Systèmes Industriels has been supporting the armed forces since 1856 and works with shipyards, integrators and end users providing reliable, state-of-the-art systems and equipment.

SUPPLYING SYSTEMS and solutions adapted to your needs

LARGE OPENING/CLOSING SYSTEMS

Special doors, sonar doors, torpedo doors, inspection pit covers, etc. CNIM Systèmes Industriels designs the mentioned **for all types of**: surface vessels, submarines, ferries, offshore, etc.

Make to specification (pressure, sea-states, etc.), our opening systems provide **secure functionalities for the lifetime of the ship**.

TURNKEY SOLUTIONS from design to delivery

TRANSFER AND HANDLING SYSTEMS

CSI produces and delivers critical transfer and handling systems to meet **the most demanding customer's specifications**.

From loading, to handling on board and from launch to recovery, we ensure ultra-secured operations for sensitive products:

- ▲ ammunition (torpedoes, missiles, etc.)
- ▲ ROVS
- ▲ RIBS, tenders, etc.

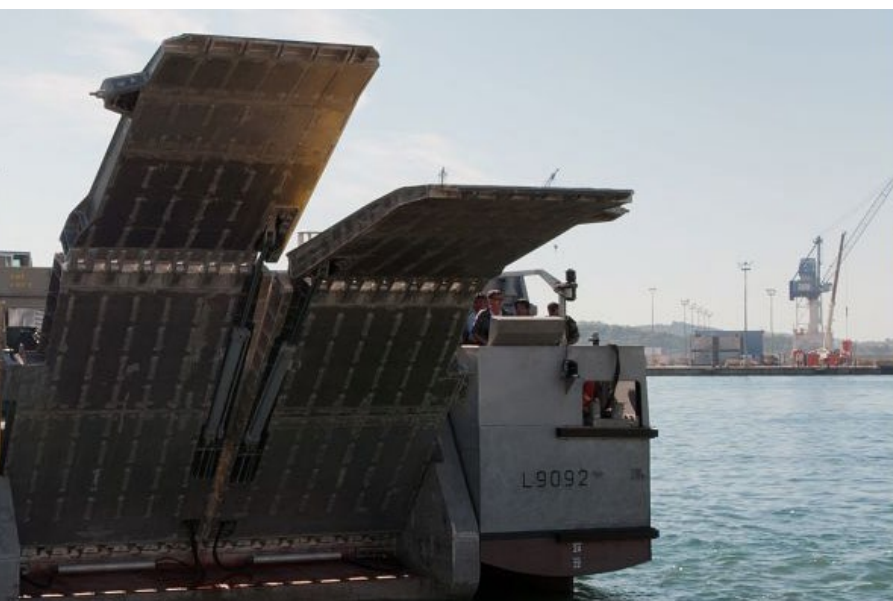

Our expertise in materials (composite, high-strength steels, polyurethane, etc.), enables us to provide reliable systems with optimised weight.

Thus, for more than 60 years, CNIM Systèmes Industriels has been the exclusive manufacturer of the missile launch tube sealing systems fitted to all French nuclear submarines.

PAYLOAD MANAGEMENT

As an expert in complex systems, CNIM Systèmes Industriels offers tailored solutions to provide **full control and monitoring** of the lifting and movement of payloads..

Loading platforms, lifting platforms, access ramps, etc., our systems are designed, produced and qualified to operate in **extreme operational conditions**: speed, sea conditions, shocks, vibrations.

Our systems enable the transfer and handling of high value packages with the most accuracy and safety.

Our solutions are proven and tailored to our customer's needs and meet the highest level of demand :

- ▲ whatever the **naval platform**: specific local restrictions on vessel, confined spaces on subs, etc.
- ▲ no matter of the **operational conditions**: rough sea, extreme weather conditions, etc.

Our platforms meet the **highest classification requirements** (IACS, BV, ISO, etc.) and ensure optimum operational reliability and technical performance.
