

Overview of the Charters, Codes and Procedures structuring the Group ethical and corruption risks management program

CNIM aims to be a benchmark in all its core business segments: Environment, Energy, Defence, Security and High technology; and is fully committed to its international expansion.

In its business operations, CNIM promotes:

- A culture of integrity and compliance based on adherence and adaptation to the latest ethical standards and legislation applicable in France and in all countries where its employees operate and its activities are run;
- A zero tolerance policy against corruption in all its forms.

In this context and given the requirements induced by the French law addressing transparency, anti-corruption, and economic modernization, also known as Sapin II, the Group has updated and completed its management program addressing ethical and corruption risks. The body of documents giving structure to this program is made of the following charts, codes and procedures and applies to CNIM Groupe and its subsidiaries.

It is the responsibility of each individual to act in accordance with the rules and principles contained thereto. The Group General Counsel is at your disposal to help with any question or concern.

Louis-Roch BURGARD
CNIM Groupe Chief Executive Officer

	Scope	Publication
